# **ThinkVision T27p-30**

# **Brilliantly business-like**

# A dominant display for the workplace

While processing power is important, the ability to see your work clearly and in detail is just as, important. The right display can make or break your work, especially if you're keeping track of multiple things at once. Data and financial analysts, creative professionals, and developers all depend on having robust displays that display their efforts accurately every time. ThinkVision T27p-30 ticks all those boxes. Made to deliver near-perfect visual experiences, it is also a highly ergonomic device made with the user in mind. It goes above and beyond with a wide range of ports for highly practical connectivity. The incredibly thin bezel on its 3-side NearEdgeless design makes adding multiple monitors a breeze. Its incredible Ultra HD resolution (3840 x 2160), when paired with In-Plane Switching and wide viewing angle delivers impressive visual clarity. Its Natural Low Blue Light Technology paired with TÜV Rheinland Eye Comfort certified technology immensely reduces eye fatigue while displaying without color distortion. Multiple ports such as HDMI 2.0 and Display Port 1.4 make cross-device connectivity as plug-and-play as possible.

# Features of ThinkVision T27p-30 monitor

### **Distraction-free clarity**

Most work today is highly visual, regardless of whether it's content creation or not. Data analysts, coders, financial traders, architects – everyone in these occupations – and more besides, need to see what they're doing. The display quality makes a huge difference as well, and in some cases, helps identify and correct errors that could have serious consequences. The ThinkVision T27p-30 offers crystal-clear clarity and 4K resolution (3840 x 2160). In-Plane Switching ensures consistent visual clarity. The narrow bezel design and multiple ports allow connecting multiple monitors for better versatility and more screen space.

### Versatile connectivity

Having a versatile system that handles multiple tasks at once is a blessing. A monitor is a big part of that too, and the right one makes the most complex of tasks a breeze to handle. ThinkVision T27p-30 is armed with a host of ports designed for convenience. The USB-C Gen2 and Display Port allow users to string multiple monitors together. The HDMI 2.0 brings seamless high-definition connectivity to life, and the RJ45 port allows a direct network connection. The audio-out can be used to connect a speaker or headset.

### **Considerate design**

Long hours in front of a monitor are almost guaranteed, no matter what you do. Employees on average spend at least 6 hours in front of a screen, sometimes more. So, user comfort, both in terms of ergonomics and reduced eye strain is vital. The monitor's Natural Low Blue Light technology and TÜV Rheinland Eye Comfort certified technology care for your eyes without affecting color accuracy. ThinkVision T27p-30 comes with a host of features that provide a comfortable user experience in every way. Its stand rises to 155mm to accommodate different heights and work modes, and a wider 23.5° tilt. ThinkVision T27p-30 is also incredibly good at using less space. Its smaller base means it can be pushed closer to the edge. The built-in phone rack is a convenient place to always keep your phone in sight – so you never miss a message or call.
